PROJECTS

Food Fusion Project

A full-featured culinary web application designed to promote home cooking and creative food sharing among users. The platform allows users to browse global recipes, contribute to a community cookbook, join live cooking workshops, and access culinary resources.

 [View Project](#)  Jan 2025 - Mar 2025

WeatherForecast-by-Json

A real-time weather forecasting web app that retrieves and displays weather data using a public JSON API. The app shows temperature, humidity, wind speed, and conditions based on user-input city names, using clean UI components.

 [View Project](#)  Aug 2024 - Aug 2024

Student-Management-System

A simple yet efficient web-based system for managing student records including adding, updating, and deleting students, as well as managing courses and performance data. Designed for administrative use in small academic environments.
